

FT WAYNE ASG MYSTER QUILT 2024

CLUE 3

Now that you have made your first subblock, make 3 more matching blocks using the print strips and background you used in your first block.

Take those 4 matching blocks and lay them out as pictured below. You have just made a star pattern. Assemble the 4 blocks together into 1 large block that should measure close to 12 ½ inches when sewn together.

Repeat making your subblocks as in your first 2 clues, join them together to make 20 large star blocks.
